

# Wayne Cotter

Wayne needs to participate in a brief sound check with full light and sound crew available. If PowerPoint or similar slide presentation is included, a small, reasonable amount of additional rehearsal time is needed for an expedited run-through.

## Requirements:

Stage: Riser and backdrop, or equivalent, at a minimum. Theatrical stage wash lighting. Dance floor or similar gap between stage and audience is to be avoided. In oblong venues, avoid placing stage at one end of a long "tunnel" of seating.

A/V: Professional. theatrical sound system. Wireless handheld mic with backup available. Standard mic stand where possible. For some emcee performances, wireless lav mic is acceptable or preferred. Built-in banquet room PA with ceiling speakers is always to be avoided. For appearances including slide presentation content, either HDMI audio and video hookup to laptop or crew-operated presentation computer with remote must be provided.

Additional: Bottled water backstage and onstage.
